Before using this product for the first time, please read the following safety instructions carefully:

- Safety & Operation**
- Do not operate the product on wet or high-temperature surfaces. Avoid outdoor use.
 - Stop using the product immediately if it malfunctions or appears damaged. Contact customer service for assistance.
 - Do not allow children to use this product unsupervised. Adult supervision is required, and the product should not be treated as a toy.
 - This product should only be operated by individuals with proper knowledge and experience, or under appropriate supervision.

- Important Notes**
- Vacuum sealing is not a sterilization process and does not kill bacteria.
 - Vacuum sealing removes most of the air from the container, helping reduce bacterial growth and slow down food oxidation. Actual results may vary depending on storage conditions such as light exposure and temperature.
 - Vacuum sealing is not a replacement for refrigeration, freezing, or canning.
 - Perishable foods must still be refrigerated.
 - This vacuum pump is designed for use exclusively with FOSA vacuum canisters.
 - Food residue on the lid or valve may affect vacuum performance. Please clean thoroughly before use.
 - Do not overfill the canister with food or liquids. Leave some space to ensure proper sealing.
 - Always store FOSA vacuum canisters upright. Do not store them sideways or upside down.

- Risk of Electric Shock – Safety Warnings**
- To reduce the risk of electric shock, whether using the battery-powered or rechargeable vacuum pump, please avoid the following:
- Do not use the product in wet environments (e.g., near sinks or in bathrooms).
 - Keep hands dry during operation.
 - Do not immerse the vacuum pump in water or allow water to enter the unit.
